About me

I am a friendly and communicative person getting in as many group activities as I can. My main passions involve outdoor activities, cars and informatics. I use a lot of my time for my passions trying to learn more and more in order to improve. **Dedication** and **adaptability** are keywords for me because they sum up my character. I will always give everything I have in order to achieve what I decided to even if it means getting out of my comfort zone. The motto that dictates my lifestyle is that you have something to learn from every encounter with the life you have because there is always something to learn or improve.

Technical Skills

C++

C

Java

OracleSQL

Microsoft Office

AutoCAD×5 HTML×3 Ubuntu×3.5

R×2.5 Matlab×3

Personal Projects

Here are some of favourite projects I've done, the rest can be found on my [Github](#)
OracleSQL/Java

Car company database with interface

Database created in order to manage the activity of a car company created in **SQLDev** with an app interface created in **Java**.

C++

Management of multiple companies

The project contains multiple **OOP** concepts such as STLs, templates, inheritance, dynamic cast, and many more.

AutoCAD

Nissan 350Z 3D model

The project catches my passion for cars, it is a complete 3D model of a Nissan 350Z at 1:100 scale including 75+% of the real components.

Experience

since 2018 **Freelancer-Data Entry** Upwork

Started my career as a freelancer in order to discover new domains. Developed skills in **Data Entry** and improved my **communication**.

since 2018 **Virtual Assistant** Gracedigital

Hired as a Virtual Assistant initially but my workflow evolved in other areas such as **accounting, product placement, marketing**. Because of this my significant asset learned is the **adaptability** to new tasks.

Education

since 2019 **Bachelor's degree** University of Bucharest

Majoring in Computer Science

I've decided to continue pursuing my passion for Informatics at the Faculty of Mathematics and Informatics in Bucharest. I am in a 4-year study program. I managed to develop great skills in **C++, C, Java, OracleSQL, Computer Networking, R**, and many more.

2015-2019 **High school** Liceul Teoretic "Traian" - Constanta

Specializing in mathematics and informatics.

It put the basis to my **Computer Science** development.

Awards

2018 Mention Diploma at the Provincial Olympiad in Informatics.

2017 Second place at National Competition: "Sci-Tech Challenge" by ExxonMobil - It was a **team based** contest with 120 participants.

2017 Participant at the Provincial Olympiad in Informatics.

Volunteering

since 2019 **Fundraiser** "Asociatia Studentilor la Matematica si Informatica"

After I started the university I decided to get involved in the student's association to work in a group, on student problems.

2017-2018 **Graphic Designer** "Asociatia Elevilor din Constanta"

I've joined the Pupil Association from Constanta because I wanted help improving the scholar system.

Other information

I decided to shift my workflow from my current one to the **Informatics** side in order to pursue my passion. I want to start working in this domain because I consider that if you work on something that you love you do it more efficiently. Even though my previous work is not related I still think that certain skills learned will still help me such as **adaptability, communication, efficiency, fast learning, time-management**.

Languages

Romanian: Native or bilingual proficiency

English: Fluent, professional working proficiency

French: Elementary proficiency
